

THE LAST TWENTY-FOLD ACCELERATION IN THE MAYAN CALENDAR

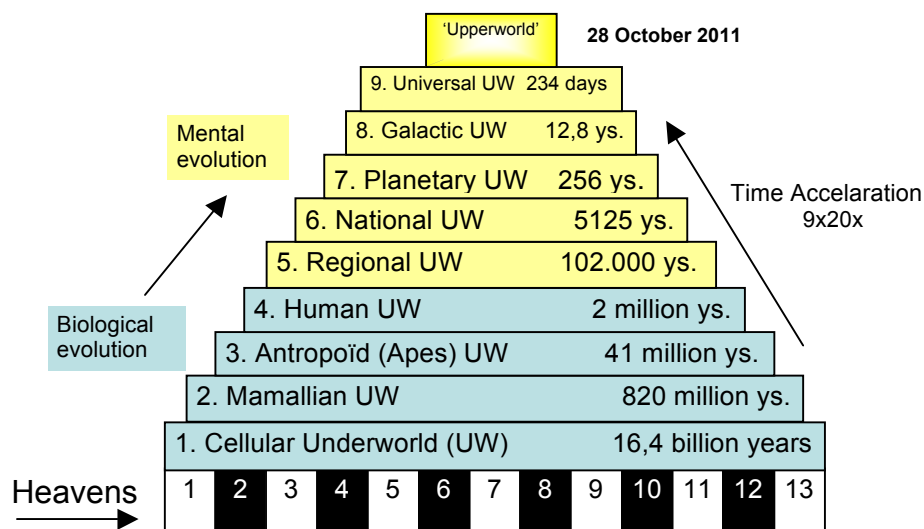

The Mayan calendar provides a timeline for the evolution of consciousness. The ninth and last twenty-fold acceleration in this calendar is dated on 9 March 2011. This date marks the beginning of the Universal Underworld. It is a short time cycle of only 234 days which ends on 28 October 2011. During this period, in 13 'days' and 'nights' of 18 full days, our consciousness will - at a tempestuous speed - take the last steps to a higher form in which we shall live more unified. On which facts are these expectations based? And which possibilities do this 'end-phase' of the Mayan calendar offer us?

The timeline in the Mayan calendar

Researcher and author Carl Johan Calleman uncovered the timeline of the evolution in a phenomenal way. According to him, the calendar describes the shift of spiritual or cosmic energies towards an increasingly higher or more complete consciousness. The 'creation plan' of the evolution unfolds in nine energy waves, or time cycles. The Mayans call these 'underworlds'. Through nine underworlds consciousness evolves to increasingly higher levels to end in an 'upper world' where man has taken a leap (or will take the last step?) towards unity consciousness. The addition between brackets is not unimportant; I shall come back to this in a later article¹.

The new underworlds are so to speak stacked upon the previous ones. In each previous underworld a required foundation of consciousness is established as a result of which a new and higher level of consciousness can develop in the next underworld. At the end of each underworld, or energy wave, consciousness has developed in such a way that a (mysterious) twenty-fold acceleration in pace can take place, i.e. a shift in consciousness. These shifts succeed each other increasingly faster because every new underworld is 20 times shorter than the previous one.

The first underworld, in which cellular life developed at a very slow pace, lasts no less than 16,4 billion years. In the next underworlds the pace of development accelerates by a factor 20 to respectively: 820 million years, 41 million years, 2 millions years, et cetera, ending in the ninth and last underworld with 234 full days. The next figure, derived from the old Mayan pyramids, represents this step-by-step development.

¹ In a next article I shall specifically discuss the term unity consciousness, and differentiate between its several definitions. Please also refer to my book 'Licht op Bewustzijn'.

Each underworld, in its turn, can be divided in 13 periods, called 'heavens', i.e. seven 'days' and six 'nights', in which consciousness manifests itself in an alternating day and night rhythm. During each 'day', the central force in the cosmos (symbolized by the Mayans and in other cultures by the tree of life²) emits a new creative, initiating energy pulse, which will be integrated and further developed, for most part underground, during the following 'night'. In this nightly process a firm foundation is built for the next creation pulse in the following day. Most energy pulses, both the creative as the integrative ones, are often invisible at first, but will be manifested in the end into external forms (that is: a particular development, event or phenomenon).

The previous twenty-fold accelerations

The beauty and uniqueness of Calleman's findings lie in the overwhelming number of empirical facts which support his theory. As such it is odd that his theory hardly receives any attention in regular on empirical facts based science, and seems not to be taken seriously. The same applies to most researchers of the Mayan calendar and a large group of New Age adepts, who only focus on external astronomical events and the connected 'end date' 21 December 2012. They too give no attention to the fact that Calleman's breathtaking theory is supported by numerous facts.

Which facts am I talking about? An extensive description can be found in the books and articles of Calleman and the ones of my own.³ Especially in 'The Purposeful Universe', biologist Calleman describes in a very thorough manner the development of life in hundreds of million years. He puts this development alongside the almost immeasurable ruler of the first five underworlds and respective heavens. In this paragraph, however, I shall focus on the start of the three penultimate underworlds: the sixth National, the seventh Planetary and the eight Galactic underworld.

The beginning of the sixth *National underworld* (3115 BC) is marked by the sudden rise of higher civilizations like the ones in Egypt, Sumer (now mostly Iraq and Syria) and the Indus valley (now Northwest India and part of Pakistan). Calleman calls this underworld 'National' because the regional structures which formed in the fifth Regional underworld transformed over a period of 5125 years to countries or nations. This took place during 13 heavens of each 144.000 days (approximately 394 years). The thirteenth heaven, or the seventh day, of this underworld started in the year 1617 AD. This year marks the beginning of the Age of Reason, with the arrival of enlightened minds in every area: Descartes, Gallilei, Spinoza and many others in science; great Dutch and Flemish painters like Rembrandt and Rubens; and some decades later great musicians like Bach and Händel

The empirical evidence for the next twenty-fold acceleration beginning with the seventh *Planetary underworld* in the year 1755 AD is the start of the Industrial Revolution in England in that same year, a revolution which would change the world. In this underworld, which lasts for 256 years, planetary consciousness developed in 13 heavens of each 7200 full days (approximately 20 years). This development manifested itself in tangible events like world wars, the consequent establishment of supranational institutions like NATO and United Nations, and in an ever growing globalisation. The thirteenth heaven or the seventh day of this Planetary underworld started in 1992. In that year the World Wide Web (WWW) was launched. Internet became a fact, a phenomenon which again would change the world.

The real worldwide breakthrough of Internet happened in 1999 and caused a true IT-revolution. This breakthrough coincided with the start of the eighth *Galactic underworld* on 5

January of that year. Since then the world developments gained unprecedented momentum, in which during 13 heavens of only 360 days consciousness is developing towards a galactic earth-transcending level. The thirteenth heaven or the seventh day started on 3 November 2010. Since this date we see a growing number of reports on new technologies like nanotechnology and alternative energy supplies, but also on the search for extra-terrestrial life and for the smallest fundamental particle. I expect that a breakthrough in one or all of these areas (or something else, surprisingly different?) will take place in the ninth and last Universal underworld, which will start on 9 March 2011.

In my view, the mentioned developments and events show exceedingly clear that there is truth in the time plan which was found by Calleman in the Mayan calendar. Evidently at the respective starting moments of the mentioned underworlds consciousness developed so much that a great leap forward could be made. These are also called quantum shifts or breakthrough moments in formerly gradually passing development currents.

The last twenty-fold acceleration on 9 March 2011

Since 17 July 2010, we are in a so-called pre-wave of the coming ninth energy wave or underworld. This date was called Conscious Convergence by Calleman⁴. On this date a pre-wave started of 13 periods of 18 days which, on the turning point of 9 March 2011 will continue more intensively in the Universal energy wave (or underworld) of 13 heavens of 18 days each, leading to the end-date of the Mayan calendar on 28 October 2011

In this last Universal underworld the pace of developments in the outside world, and consequently also in our inside world (of which the outside world is but a mere reflection) will again accelerate by a factor 20. Where most people already find it difficult to keep up with the current pace of developments, this feeling will increase dramatically after 9 March. It will be less and less possible to resist the impulses which are given to us by the cosmic tree of life, and we shall have no choice but to go along with the flow of developments

In the months preceding 9 March, one can already see clearly that human individual consciousness no longer resigns itself to dominance by external power structures. The protests in the Arabic world which started in January 2011 illustrate this vividly. The people rise against their oppressors, who no longer can withstand the ever stronger growing individual. Via the worldwide communication methods which have been made possible by internet - the most striking manifestation of the eighth Galactic underworld - individuals are able to join forces in no time to form comprehensive and powerful movements.

A salient detail is that this revolution started in Tunisia which borders to the 12° longitudinal line, according to Calleman the borderline between West and East, around which he noticed several significant developments in the different underworlds⁵. Another, and maybe even more salient, detail is that the next revolution took place in the birthplace of the ancient Egyptian civilisation which came into existence at the beginning of the National Underworld. Also this revolution was executed very quickly starting on 25 January and ending on 11 February. Indeed, a period of 18 days! This is exactly the length of a heaven in the coming Universal Underworld, and gives us a taste of the speed of developments in that underworld. On top of that, 11 February 2011 is the start date of the last Tzolkin cycle of 260 days towards the end date of 28 October. The Tzolkin is the holy calendar in the multi-layered calendar system of the Mayans.

Not only dictatorships but also other centres of power based on dominance are about to fall apart. Examples are: the monetary system which central governments and banks are desperately trying to keep upright with reckless money creation; religious institutions like the

Vatican which is no longer able to cover the cesspool of the outrageous child abuse committed by priests tormented by senseless celibacy; previously powerful armies like the one of the US which appears to be powerless against medieval forces like the Taliban and the so called 'Al Qaida'; cover-ups by governments and diplomats which are brought to the surface by WikiLeaks. Nothing remains hidden in a world that becomes more transparent every day.

These are all exceedingly clear signs, for those who want to see them, of an approaching shift in consciousness in which mankind will cast off the yoke of external powers and forces, and will also realize that the only authority is the one that exists in oneself. At the same time this realization will result in the knowledge that it is absurd to keep on fighting each other because every individual is part of one and the same consciousness.

In the Universal underworld, which begins on 9 March, man will receive through the impulses from the cosmic tree of life, some unique possibilities to develop a more unified consciousness, which consequently will prolong his physical existence on this earth. In order to tune into the coming powerful cosmic impulses of the tree of life it is important to know and keep track of their exact timing.

The time plan of the ninth underworld

The ninth and last wave of consciousness evolution in the Mayan calendar – the Universal Underworld – covers a period of 234 days to be divided in 13 heavens of 18 full days. As in the complete time plan of the Mayan calendar, the number 9 is again a central number.

Here is some numerology to illustrate this: the sum of the individual numbers of the periods of this underworld is $2+3+4=9$; also the sum of the length of each heaven is $1+8=9$. The same applies to all previous underworlds. The eighth underworld covers 4680 days (approx. 12,8 years), and $4+6+8=18$ ($1+8=9$). Each of its heavens counts 360 full days, where $3+6=9$. The seventh underworld covers 93.600 days (approx. 256 years) and $9+3+6=18$. Every heaven in this underworld counts 7200 days (approx. 20 years), where $7+2=9$. The sixth underworld covers 1.872.000 days (approx. 5125 years) and $1+8+7+2=18$. Each of its heavens counts 144.000 days (approx. 394 years), and $1+4+4=9$. The same numerological principle applies to each underworld. The number 9 is therefore a very central number in the Mayan calendar. Why is this so important?

Because we are at great speed approaching a grand finale in which this number indicates a rhythm to which we can connect in order to tune into the cosmic impulses of the tree of life. In the ninth underworld, quite literally, a 9 day rhythm will be introduced, which I shall refer to as the *9 day count*. This rhythm is a direct consequence of the length of the heavens in this underworld, which only count 18 days (2×9). During this 18-day cycle called *uaxacлахunkin* by the Mayans (literally: 18 days) some days are more important than others, that is:

- The first day of the *uaxacлахunkin* (day 1 of the first 9 day count).
- The top or crest of the *uaxacлахunkin*, which consists of two days (day 9 of the first 9 day count and day 1 of the second 9 day count).
- The last day of the *uaxacлахunkin* (day 9 of the second 9 day count).

On the first day the seeds of the new energy are sown. On the two peak days the new energy reaches its maximum level. And on the last day we need to let go of this energy and prepare ourselves for the arrival of the energy of the new heaven ('day' or 'night').

In order to be able to tune into the energy of the different days, we need to know and keep track of the dates of each *uaxacлахunkin*. That is why I am providing the time plan of these dates:

For the remaining period before the start of the Universal underworld (the end of the pre-wave which started on 17 July 2010):

- 1 February – 18 February (the peak is on 9-10 February)
- 19 February – 8 March (the peak is on 27-28 February)

For the Universal Underworld:

- Day 1: 9 March – 26 March (peak on 17-18 March)
- Night 1: 27 March – 13 April (peak on 4-5 April)
- Day 2: 14 April – 1 May (peak on 22-23 April)
- Night 2: 2 May – 19 May (peak on 10-11 May)
- Day 3: 20 May – 6 June (peak on 28-29 May)
- Night 3: 7 June – 24 June (peak on 15-16 June)
- Day 4: 25 June – 12 July (peak on 3-4 July)
- Night 4: 13 July – 30 July (peak on 21-22 July)
- Day 5: 31 July – 17 August (peak on 8-9 August)
- Night 5: 18 August – 4 September (peak on 26-27 August)
- Day 6: 5 September – 22 September (peak on 13-14 September)
- Night 6: 23 September – 10 October (peak on 1-2 October)
- Day 7: 11 October – 28 October (peak on 19-20 October)

For more information on this 9 day count and the universal underworld I refer to the most recent articles by Calleman.⁶

Conclusion

It is inevitable that the year 2011 will pass very hectically. This year is like no other year in history. People have at the start of 2011 as always wished each other a happy or blissful New Year, and perhaps they set some New Year's resolutions (which generally by now have passed into oblivion), as if this is just another year in our history. Nothing could be further from the truth. The already mentioned world events in the first month and a half of this year provided a preview. But this is no reason to start fearing, on the contrary! This is the year we have been waiting for. This is the year in which we as mankind can take a leap forward on the road to unified consciousness. Do you join me in the leap? You are more than welcome.
